

Initial Proposed U.S. Congressional Districts from Ohio Following Redistricting After the 2020 U.S. Census

Created by: Andrew Green

amg241@case.edu

Revised: October 6, 2021

Preface:

I would first like to begin by expressing my extreme disappointment in the Ohio Redistricting Commission. As a young person, I was extremely eager to vote in support of the 2018 Constitutional Amendment that was designed to prevent gerrymandering of U.S. Congressional Districts in one of my first elections. I have paid close attention to the redistricting process as I eagerly awaited the commission to draw fair General Assembly Districts. I truly believed that what I voted for in 2018 (and what my fellow Ohioans voted for in 2015 before I could vote myself) would create a process that would yield maps that accurately represented the state of Ohio. Wow, was I wrong. The majority party members on the commission, save maybe some half-hearted misgivings immediately prior to voting in favor of the horrendous General Assembly maps from Auditor Faber and Secretary LaRose, have expressed no interest in actually working to create maps that comply with the letter AND intent of the redistricting reforms of 2015 and 2018. Watching that process motivated me, motivated me to do something about it. I tried to come up with better maps myself, but, alas, I am but one person with a fulltime job. I didn't have the time or resources to dig into all of the requirements of the General Assembly redistricting process and put together a proposal before the new maps were adopted, but I tried. I have spent evenings and weekends since tweaking my proposal for Ohio's Congressional Districts to ensure I have all of my ducks (pardon the current OH-4 district pun) in a line. The fact that I, by myself, with only a laptop computer and an old mouse, have been able to put together a proposal that meets all requirements of the Ohio Constitution with essentially zero population variance goes to show that the argument made by the majority members of the commission that they have not had enough time to draw maps due to the 2020 U.S. Census delay is preposterous, given the fact that they have infinitely more people and resources to dedicate to this process than one person with a computer and no money. With that, I would ask that the commission simply adopt this proposed map and Venmo (@Andrew-Green-59) me the entirety of the majority party's budget for Congressional Redistricting because that is a better use of the Ohio taxpayers' money than wherever it is currently going.

Summary:

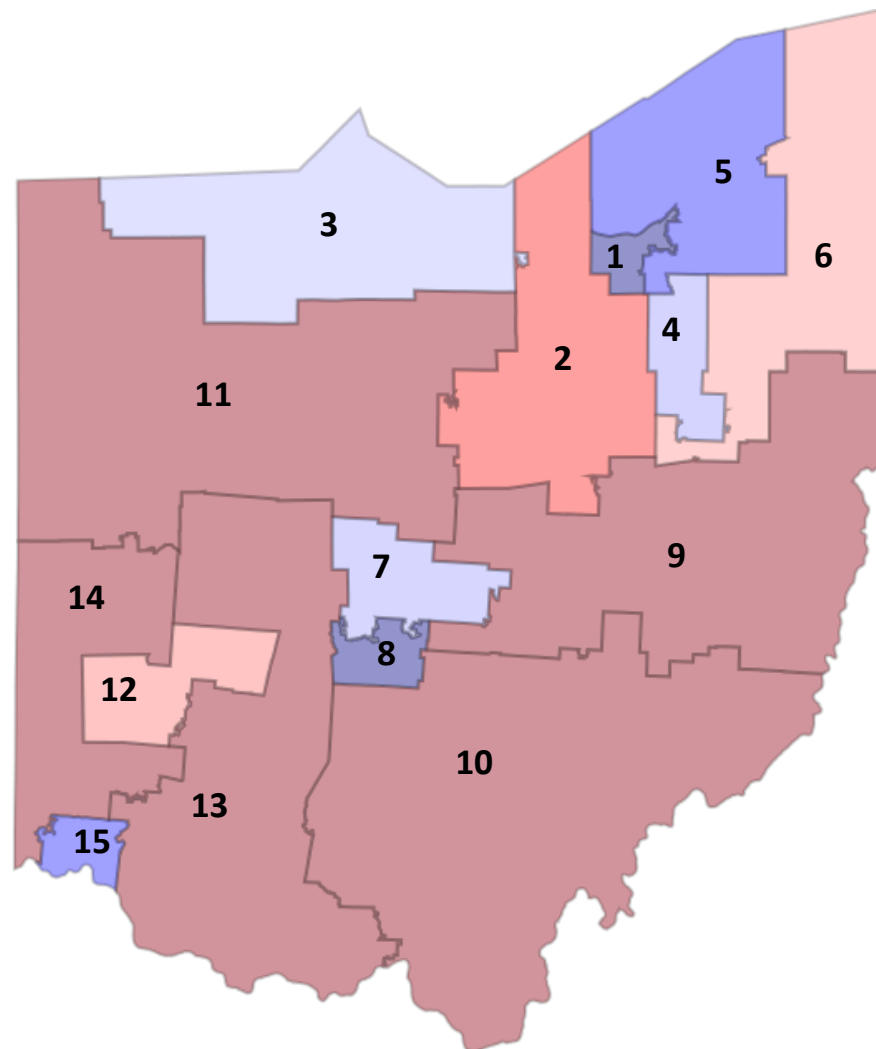

Figure 1: Proposed U.S. Congressional Districts from Ohio following redistricting after the 2020 U.S. Census.

Per Article XIX of the Ohio Constitution, the splitting of counties, townships, and municipalities shall be minimized to the extent possible. Given Ohio's congressional ratio of representation (CRR) of 786,630 and the fact that the city of Columbus has a population of 905,748, the city of Columbus must be split. Article XIX requires that the cities of Cleveland, Cincinnati, Toledo, Akron, and Dayton may not be split. Furthermore, Article XIX requires that 65 of Ohio's 88 counties be contained entirely within one district. Of the remaining 23 counties, no more than 18 may be split once and no more than 5 may be split twice. Given the fact that the populations of Cuyahoga, Franklin, and Hamilton Counties are all greater than the CRR, those three counties must each be split at least once. This finalized proposal meets those constitutional requirements by splitting only fifteen counties (Cuyahoga, Franklin, Greene, Hamilton, Holmes, Lake, Licking, Lorain, Mahoning, Muskingum, Richland, Scioto, Shelby, Stark, and Warren) once each while ensuring each district has a population between one less than the

CRR and one more than the CRR, which corresponds to a population variance of +/-0.00013%. Within the split counties, all efforts were made not to split townships and municipalities. Excluding municipalities that extend beyond county borders that also serve as district borders, only eight cities, one village, and eleven townships are split between two districts in this proposal. As mentioned in the initial proposal, three townships (Osnaburg in Stark County, and Franklin and Jefferson in Franklin County) and one village (Granville in Licking County) are split only to ensure the contiguity of the proposed districts because those places and/or surrounding places have boundaries that are non-contiguous. One city, Columbus, was split because it is too populous to be contained entirely within a single district. The remaining fifteen splits are only to ensure equal population in each district.

Although not an explicit requirement, in the spirit of bipartisan compromise and passing a 10-year map with a support from a majority of both major parties, districts were drawn to proportionally favor each of the two major political parties in approximately the same ratios as voters voted for candidates from the corresponding party in the sum of all of the statewide elections in the last 10 years, as is required in the General Assembly redistricting process. Additionally, considering the astonishing lack of competitive congressional elections in Ohio since the 2011 redistricting process, an effort was made to promote competitive districts. A summary of the proposed districts can be found in Table 1 below. Information regarding the splitting of counties and townships/municipalities can be found in Table 2 and Table 3 below, respectively.

No consideration was made in creating this map to ensure each incumbent would live in a district that no other incumbent lives in. That said, I contend that incumbency is well preserved in this proposal, especially considering there is no requirement that one live in the same congressional district that they represent. Therefore, none of the current representatives would have to run against another for the same seat despite Ohio losing one congressional seat, given Representatives Ryan's and Gonzalez's retirements. Even if the soon-to-be incumbents of the currently vacant 11th and 15th districts were in office today, there would still be one more open district than there are incumbents. Representatives Chabot and Wenstrup are required to be redistricted into the same district because the city of Cincinnati can no longer be split like it was in the previous map. The fact the Representatives Kaptur and Latta live about 20 miles from each other but represent two different districts is troublesome. This issue was only allowed to occur due to the intense partisan gerrymandering that created the extremely narrow west-to-east "snake on the lake" that Representative Kaptur has represented since 2013. Since Representative Latta lives south of Representative Kaptur, they have lived in separate districts for the last 10 years. In order to rid the state of that egregious man-made geographical feature, it only makes sense and it is almost necessary to redistrict Representatives Kaptur and Latta into the same district. Additionally, the likely winners of special elections in the current 11th and 15th congressional districts (Shontel Brown and Mike Carey, respectively), have not even won their respective elections let alone taken office yet, so it makes no sense to preserve their incumbency before they are even elected.

Table 1: Summary of Proposed Congressional Districts with populations according to the 2020 U.S. Census, Political Voting Index calculated by DistritBuilder.org using data from the 2016 and 2020 presidential elections, party voting margins in the sum of all statewide partisan elections in 2016, 2018, and 2020 (per DRA), and the percentage of the population made up of racial minorities

This congressional map proposal was created using a popular online redistricting application, Dave's Redistricting App (DRA). Block files from DRA were imported to DistrictBuilder.org, another open-source web-based redistricting tool, to verify the maps and for additional analysis. The proposal can be viewed on DRA at

<https://davesredistricting.org/join/9dd8a3ba-4c7f-4aab-8dbc-dd5e8bb7dda0> or on DistrictBuilder.org at <https://app.districtbuilder.org/projects/931b90b1-154a-46f9-b056-617456ab5c72>.

Below is a list of comments regarding some self-identified weaknesses in this proposal:

- Districts 13 and 14 both span from east and west of Cincinnati, respectively, to well north of Dayton. This design, while not necessarily the most compact, keeps communities of interest intact in the Dayton area and provides for a reasonably competitive District 12. I do not see an easy way around this poor compactness issue without immense changes to District 12 that will make it far less competitive and split up communities of interest in the Dayton area or having either District 13 or

District 14 wrap almost entirely around District 12 and the other wrapping almost entirely around District 15, which is almost certainly a worse design.

- The minority representation in this map is likely not the best. That said, through my (albeit limited) study of the Voting Rights Act, I am convinced that this proposal is compliant with the Voting Rights Act. While there are no majority-minority districts in this proposal, there is one district (District 8) with a minority population of well over 40%. Additionally, there are three other districts (Districts 1, 5, and 15) with minority populations over 30%. Most importantly, the non-minority populations in these districts do tend to vote in line with the minority populations in the districts, so the minority vote is not diluted in those districts. In fact, I would argue that having two districts in the Cleveland area (Districts 1 and 5) with significant (but not majority) minority populations grants those minority populations a louder voice, considering they make up a substantial portion of the electorate in two districts rather than an overwhelming majority of the electorate in just one district, as is the case with the current District 11, where a very large minority population is packed into a single district.
- District 6 stretches from Ashtabula County to a sliver of the southern portion of Stark County. While this design loses some points for compactness, as a longtime resident of this proposed district, I believe that the suburban communities of eastern and southern Stark County have more in common with the communities, such as Kent, Ravenna, Warren, and Youngstown, at the core of this district than Columbiana County does. In designing District 6, the primary alternative option to including a portion of Stark County in this district was to include Columbiana County, and I do not believe putting Columbiana County in District 6 and the southern and eastern portions of Stark County in District 9 would have served either of those communities well. Additionally, the map, as drawn, makes for a more competitive District 6, which is one of the stated goals of this proposal due to the lack of competitive Congressional races in Ohio over the last decade. Furthermore, including Columbiana County instead of Stark County would have only provided a minimal increase in compactness.
- Issues regarding Article XIX, Section 7(B)8 have been resolved in this revision.

District 1 (Cleveland and Western Cuyahoga County):

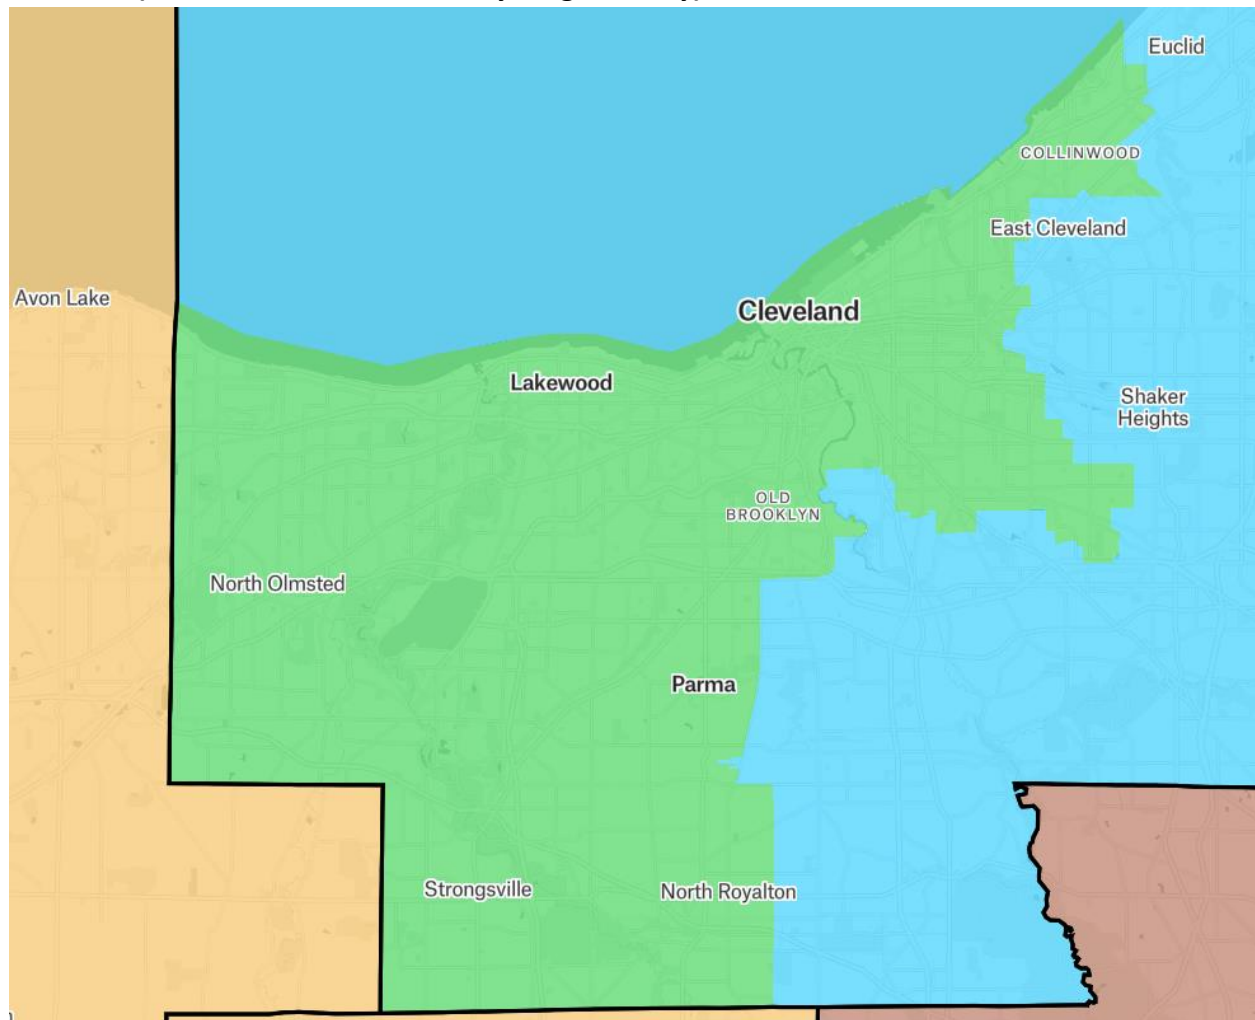

Figure 2: Proposed U.S. Congressional District 1 (green) includes the city of Cleveland and much of western Cuyahoga County.

- Incumbent: Anthony Gonzalez (R-Rocky River), retiring
- County: Cuyahoga (part)
- Major Municipalities: Cleveland, Lakewood, Parma (part), Strongsville
- 2016-2020 Composite Votes: 63.78%/33.89% (Democrat/Republican)—according to DRA
- 2016-2020 Composite PVI: D+14—according to DistrictBuilder.org
- Population: 786,631
- Variance (from CRR): +1 (+0.00%)
- Minority %: 37.14%

Table 4: Summary of townships and municipalities in Cuyahoga County in District 1
