Testimony for August 24, 2021. University of Cincinnati

When a person looks at a map, it's obvious that it is drawn to favor a republican win. Why would the east side of Hamilton County be linked to Clermont and the north side be linked to Warren? To split Hamilton County's vote. This is also demonstrated in the results of many/most of the past few elections. It is critical that a fair, independent, and representative group of individuals draw fair maps so that all Ohioan's votes are counted rather than cancelled.

Thank you  
Linda
